

How to Find Surface Area of A Cylinder

Surface area is the total of all the faces of the 3-dimensional shape.

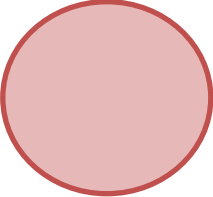

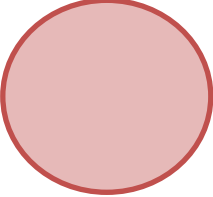

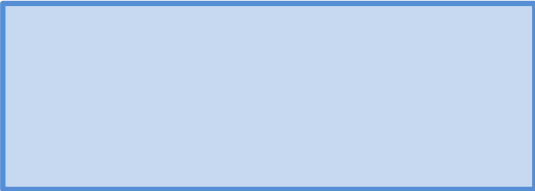

The net of a Cylinder

How to Find the Surface Area:

Surface Area = Top + Bottom + Side

$$\text{Surface Area} = \pi r^2 + \pi r^2 + \pi dh$$

<p>Top</p> 	$A = \pi r^2$
<p>Bottom</p> 	$A = \pi r^2$
<p>Side or Lateral Face (When cut, it will make a rectangle).</p> 	$A = \text{Circumference} \times \text{height}$ $A = \pi dh$
