HOW TO:
Multiply/Divide Integers

+	−	−
−	+	−
−	−	+

Multiplying Integers:

Multiply the numbers as you would if there are no signs.
Follow these rules to determine if the answer is positive or negative:

Positive × Positive = Positive	If the signs are the same, the answer will be positive
Negative × Negative = Positive	
Positive × Negative = Negative	If the signs are different, the answer will be negative
Negative × Positive = Negative	

Dividing Integers:

Divide the numbers as you would if there are no signs.
Follow these rules to determine if the answer is positive or negative:

Positive ÷ Positive = Positive	If the signs are the same, the answer will be positive
Negative ÷ Negative = Positive	
Positive ÷ Negative = Negative	If the signs are different, the answer will be negative
Negative ÷ Positive = Negative
